

# COMMERCIAL FLAGPOLE ALUMINIUM

## PRODUCT OVERVIEW

Our aluminium flagpoles are manufactured from 6063 T6 aluminium to ensure long life and durability in all weather conditions. The tapered pole with internal or external roping system is available in heights of 5 – 12 metres as standard or up to 20 metres on request and complete with hinged base plate and a gold or silver onion finial.

The external halyard option means the flag can be quickly and easily lowered and raised as the halyard is on the outside of the pole, whereas the anti-vandal internal roping system is ideal for flagpoles in more public areas. The halyard is tucked away inside the pole and accessed through a locked metal door which is flush to the pole to maintain its streamline look.

Each pole is available with a satin brush finish or white powder coated finish depending upon the look you desire and comes with a 2 year warranty.

## PRODUCT SPECIFICATIONS
