

FEATHER FLAG

PRODUCT OVERVIEW

Security and safety is key – that's why we supply a locking pin as standard with all of our flags. This tool doesn't only prevent theft of the pole, but it also keeps the pole and flag in place during strong winds.

The Feather Flag is available single or double sided, in full colour print on Knitted Polyester, so we guarantee that you will find a Feather Flag to suit you.

The Feather Flag comes with multiple pole and base options including a water base (15 and 25kg), ground spike, cross base and concrete base.

All of our Feather Flags come in a purpose built, reusable carry bag creating as much ease during transportation.

DIMENSIONS

Blade Dimensions		Print Size		Pole		Base Options				
Size	Height (mm)	Width (mm)	Height	Diameter	Sections	Ground Spike	Concrete	Cross	Metal	Water Fillable

- » Delivered in a purpose built, reusable carry bag creating ease during transportation
- » All bases include a 360° swivel spigot
- » Standard flags are double stitched for durability
- » Hemless versions are available for short events

FLAG SHAPES

Blade Rectangular Teardrop

Our flags are tested up to 15mph but are known to withstand higher wind speeds. This guide should be used with discretion as severe gusts of wind could result in a larger number of bases being required than stated. We also recommend that the security/safety pin (supplied with flagpoles) is always used to prevent the flagpoles from moving from the spigot on the base.

OUR RECOMMENDATIONS

Take advantage of the 360° rotation by showcasing your event, sponsors or key messages which will be seen by attendees from all directions.

*Additional bases can be stacked.

*Available in 15kg or 25kg.
