Assembly

Assemble the pole in size order, large to small. This example shows assembly for the medium pole. Insert pole B into pole A and pole C into pole B.

1

Thread the flag onto the pole ensuring that the pole is fully inserted into the strengthened end of the sleeve, take care not to damage the sleeve.

2

Push the clip through the back of the eyelet. A degree of force is required, you should hear a click once it is in place. Attach the bungee cord to the plastic retaining collar and adjust the tension if necessary (to avoid rippling, do not over tension the flag).

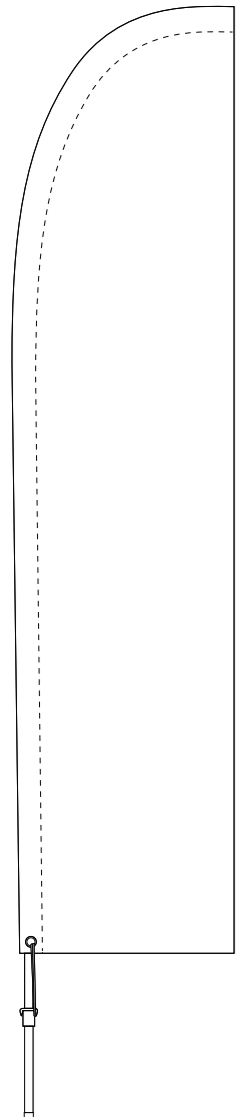

3

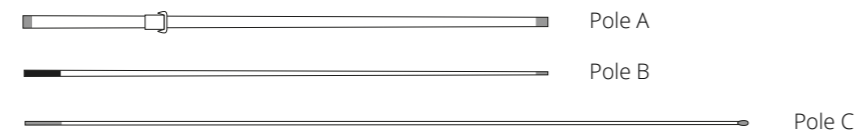

We recommend leaving the bungee attached to the eyelet for safe keeping and easy install.
