

GARDEN FLAGPOLE EXECUTIVE

PRODUCT OVERVIEW

The executive garden flagpole is the strongest of our garden flagpole range. Manufactured in our UK facility with a range of accessories available, we can help you find the perfect flagpole to fly your flag with pride at home.

Made from 3mm thick glassfibre, the executive garden flagpole can also withstand wind speeds of up to 85mph. This means you don't need to worry about taking your flagpole down even on the windiest of days.

The tapered, shiny white appearance gives any home that extra touch of elegance.

The executive garden flagpole comes with an external roping system so that you can easily raise and lower your flag.

We provide advice on which flagpole will suit your needs, where best to install it and any planning permissions you will need to obtain. We also offer a full installation service if you would rather not tackle the job yourself.
